

HONEYWELL ACLAR[®] HEALTHCARE PACKAGING

Sustainability Opportunity Policy

Honeywell

SUSTAINABILITY OPPORTUNITY POLICY

Our Sustainable Opportunity Policy is based on the principle that by integrating health, safety and environmental considerations into all aspects of our business, Honeywell protects its people, communities and the environment; achieves sustainable growth and accelerated productivity; drives compliance with all applicable regulations; and develops technologies that expand the sustainable capacity of our world.

Environmental Commitments

Our commitment to be more efficient and responsible is reflected in the extensive work we do to make our business more environmentally friendly, safer and more sustainable.

Reducing Waste

As part of our dedication to environmental responsibility we have reduced waste by over 40%¹ at our Aclar films production facility.

Packaging Material Reduction

Aclar films helps enable the creation of smaller blister pack sizes and can directly reduce secondary packaging, raw material (film or foil) usage, scrap production, warehousing expenses and transportation cost up to 55%² when compared to the same product packed in alu/alu.

¹Over a 10 year period

Responsible Care

Honeywell Aclar Healthcare Packaging is part of the Performance Materials and Technologies (PMT) business and is a participant in the Responsible Care program of the American Chemistry Council. It is a global, voluntary initiative developed by the chemical industry to drive continuous improvement in health, safety and environmental performance, together with open and transparent communications with stakeholders. Our PMT Headquarters have been certified RC-14001 by an external ISO registrar since 2005.

More from Honeywell Aclar Healthcare Packaging

From reducing our energy consumption and preventing unnecessary waste, to diminishing our carbon footprint and improving our sustainability performance, we are operating a socially conscious and responsible business for generations to come. We are going to launch additional programs to support these initiatives, and communicate them to our customers. Environmental responsibility is a key component of our culture and you will continue to see results from our continuous improvement in the future.
