

4 REASONS TO CHOOSE SOLSTICE[®] N71 (R-471A) REFRIGERANT FOR YOUR NEXT PROJECT

Solstice[®] N71 (R-471A) is Honeywell's newest non-ozone-depleting, nonflammable and nontoxic, hydrofluoro-olefin (HFO)-based refrigerant, offering distinct advantages over R-404A and CO₂. Here are four reasons why it should be your refrigerant of choice for new equipment in medium-temperature applications.

1. IMPROVE ENERGY EFFICIENCY.

Solstice N71 is highly energy efficient, so you can save on long-term energy costs.

2. MAKE YOUR INSTALLATION AND MAINTENANCE PROCESS EASIER.

Solstice N71 offers you the ability to utilize a wide array of system architectures that best fit your store design while keeping the system safe, serviceable and energy efficient. Handling, storage and transportation are also the same as any low-pressure nonflammable refrigerant – no elite experience or skillset required. That means you can choose from a larger contractor base for installation, maintenance and service.

and Capabilities

3. LOWER YOUR TOTAL COST OF OWNERSHIP (TCO).

Solstice N71 delivers the efficiency you need to save on energy costs. And because it utilizes conventional refrigeration equipment and practices, you don't end up paying a premium for installation and maintenance. In addition, it reduces the risk and unexpected expenses of catastrophic failures that may be associated with CO₂ refrigeration systems.

 **THE ONLY <150 GWP
NONFLAMMABLE HFO
REFRIGERANT BLEND**

 **COMPLIANT WITH
STATE AND FEDERAL
REGULATIONS**

4. MEET YOUR SUSTAINABILITY GOALS.

Solstice N71 has a GWP of <150 and is a low-pressure refrigerant, which drives lower leak rates. It's also compliant with state and federal regulations. Plus, because it's more energy efficient than CO₂, it helps reduce your overall carbon footprint (scope 1 and scope 2 emissions) and conserve natural resources.

NOW IS THE TIME TO GET READY.

When you're planning a new refrigeration system, reach out to us – so we can start building toward a Solstice N71 trial.
