## **Conflict Minerals Due Diligence Report 2023**

Honeywell Specialty Chemicals Seelze GmbH is committed to the responsible sourcing of tin, tungsten, tantalum, gold, or their derivatives (collectively known as “3TG”) throughout our global supply chain in a manner that complies with Regulation (EU) 2017/821 issued by the European Parliament and the Council, OECD’s “Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected Areas and High-Risk Areas” including the standards outlined in the model supply chain policy in Annex II as well as disclosure requirements implemented by the U.S. Securities and Exchange Commission (SEC).

Each year, we undertake reasonable due diligence to determine if any of our products contain 3TG originating from conflict-affected and high-risk areas (“CAHRAs”) or the Democratic Republic of Congo and bordering countries. Selected 3TG suppliers participate in an annual Conflict Minerals Reporting Template survey conducted by Honeywell that asks if they are following ethical practices and using valid sources to procure the materials.

Since Regulation (EU) 2017/821 went into effect, Honeywell has carried out regular third-party audits with DQS. The consistently excellent results demonstrate our supply chain due diligence regarding metals and our management system, risk management, and disclosure of information obligations. All our audit reports related to Regulation (EU) 2017/821 including our last one from January 2024 are publicly available and a copy may be obtained at <https://advancedmaterials.honeywell.com/us/en/seelze/honeywell-seelze/sicherheit-und-umwelt>.

In 2023, we reviewed the supply chain of our tin compounds and assessed our tin supply chain in communication with our supplier and all involved smelters. As a result of this due diligence exercise, Honeywell has decided to take precautionary action and negotiated with our supplier to remove one smelter from our supply chain which showed potential risks. The full report can be found on our website at <https://advancedmaterials.honeywell.com/us/en/seelze/honeywell-seelze/sicherheit-und-umwelt>.
